"A very good aid, in our case for a law office!"

We are using the program in our small law-firm (5 lawyers and tax officers) and it's the first aid that changed a lot in our knowledge management. We work not all at the same time, but sometimes on the same cases. So it's a program we won't miss now.

"We use powerDOCUMENTS in our clients projects"

We are a consulting company for knowledge-management from Austria. We use powerDOCUMENTS successfully in some projects for our clients. Cheap and easy to configure.

"Now we know our knowledge!"

We tested some small solutions to manage and retain knowledge for the use in our consulting company. With Powerdocuments we have found the right solution to use the valuable knowledge throughout the company. Test it!

"Well done Tool"

This helps me keep my chaos organized. I had some issues with the initial logon, but the quick and knowledgeable support helped ;) Once this was handled, it is an excellent experience ;)

"Exactly the software we were looking for"
 We were already looking for a software tool like this, but only found big and expensive solutions. This powerful tool fits just right in our environment. Thanks to KLV.

"Productsupport was great - we registered it"
 First we had problems with the Installation and Login. But KLV helped us to try the software very quickly. Now we are using the software in our swiss company to store and share knowledge about our projects.

	1	2	3	4	5	"Great knowledge management tool"
Features	●	●	●	●	●	I am responsible for evaluating products and vendors for knowledge management tool for the IT dept. Came across this one and it looks a very simple to use and very efficient program. Was easy to install as we are already working on .net environment and i had the framework installed. Would recommend this product coz it is a one-stop solution for all knowledge management needs and has a very high learning curve and one gets accustomed to the interface fairly quickly.

"Fits into our knowledge management"

This program will help us to develop our knowledge management approach. First tests have been successful. Fits good into our now starting .Net architecture.

George
